

Armis Hands-on Test Drive

Enterprise Asset Visibility: Do you Know What Devices are Connected to Your Network?

Do you know what devices are connected to your network? How do you know if they're secure? If you don't have a complete view of your enterprise assets, you can't ensure that your business-critical assets are safe. With Armis, you can get real-time visibility and control over every enterprise asset connected to your network. All the performance, all the security, all the intelligence - none of the headaches.

That's because the Armis platform is passive and agentless. Our enterprise-grade platform is fully automated and requires no agents to be installed on devices.

- 1 Armis provides enterprise organizations with 100% real-time visibility and control over all devices connected to their network.
- 2 Armis is a passive and agentless platform, meaning it does not impact device performance or network speed.
- 3 Armis' platform has all the enterprise-grade security organizations need to protect their assets, and all the intelligence they need to ensure safety and soundness.

Take intelligent asset security for a test drive

Whether it's employee-owned devices, business applications, unmanaged EKG monitors, or robotic arms on the factory floor, every asset in your network or airspace represents a potential threat to your business. Some assets are managed, some are unmanaged, including IOT, ICS, and medical devices. Regardless, Armis provides you with complete asset visibility, insight, and control.

If you want complete real-time visibility and control over every asset connected to your enterprise assets, take a test drive of the Armis platform now.

What's included in the session

The session is a fun, bespoke, in-person or virtual, class led by an instructor, and will allow you to see how the Armis platform works, as well as provide relevant cybersecurity training. So you'll get a comprehensive overview of the Armis platform, and 4 hours of Continuing Education Credits.

- High-level overview of Armis presented by Solution Architect (No Sales Pitch) - 20 -25 minutes
- Swag for participants along with drinks and food
- Hands on experience in Armis platform to help folks understand ease of use, simplicity, and business value for their organization
- Fun Capture The Flag event
- Student Lab guide will be provided (virtually or printed)

Click here to register for an upcoming event.

Key Benefits

- Identify and classify managed, unmanaged, and IoT devices in real-time.
- Monitor device activity to true-up your CMDB with new device details.
- Take action with alert driven policies through a library of out-of-the-box integrations.

About Armis

Armis is the leading unified asset visibility and security platform designed to address the new threat landscape that connected devices create. Fortune 1000 companies trust our real-time and continuous protection to see with full context all managed, unmanaged, and IoT devices, including medical devices (IoMT), operational technology (OT) and industrial control systems (ICS). Armis provides passive and unparalleled cybersecurity asset management, risk management, and automated enforcement. Armis is a privately held company and headquartered in Palo Alto, California.
